11th Spanish Conference on Electron Devices

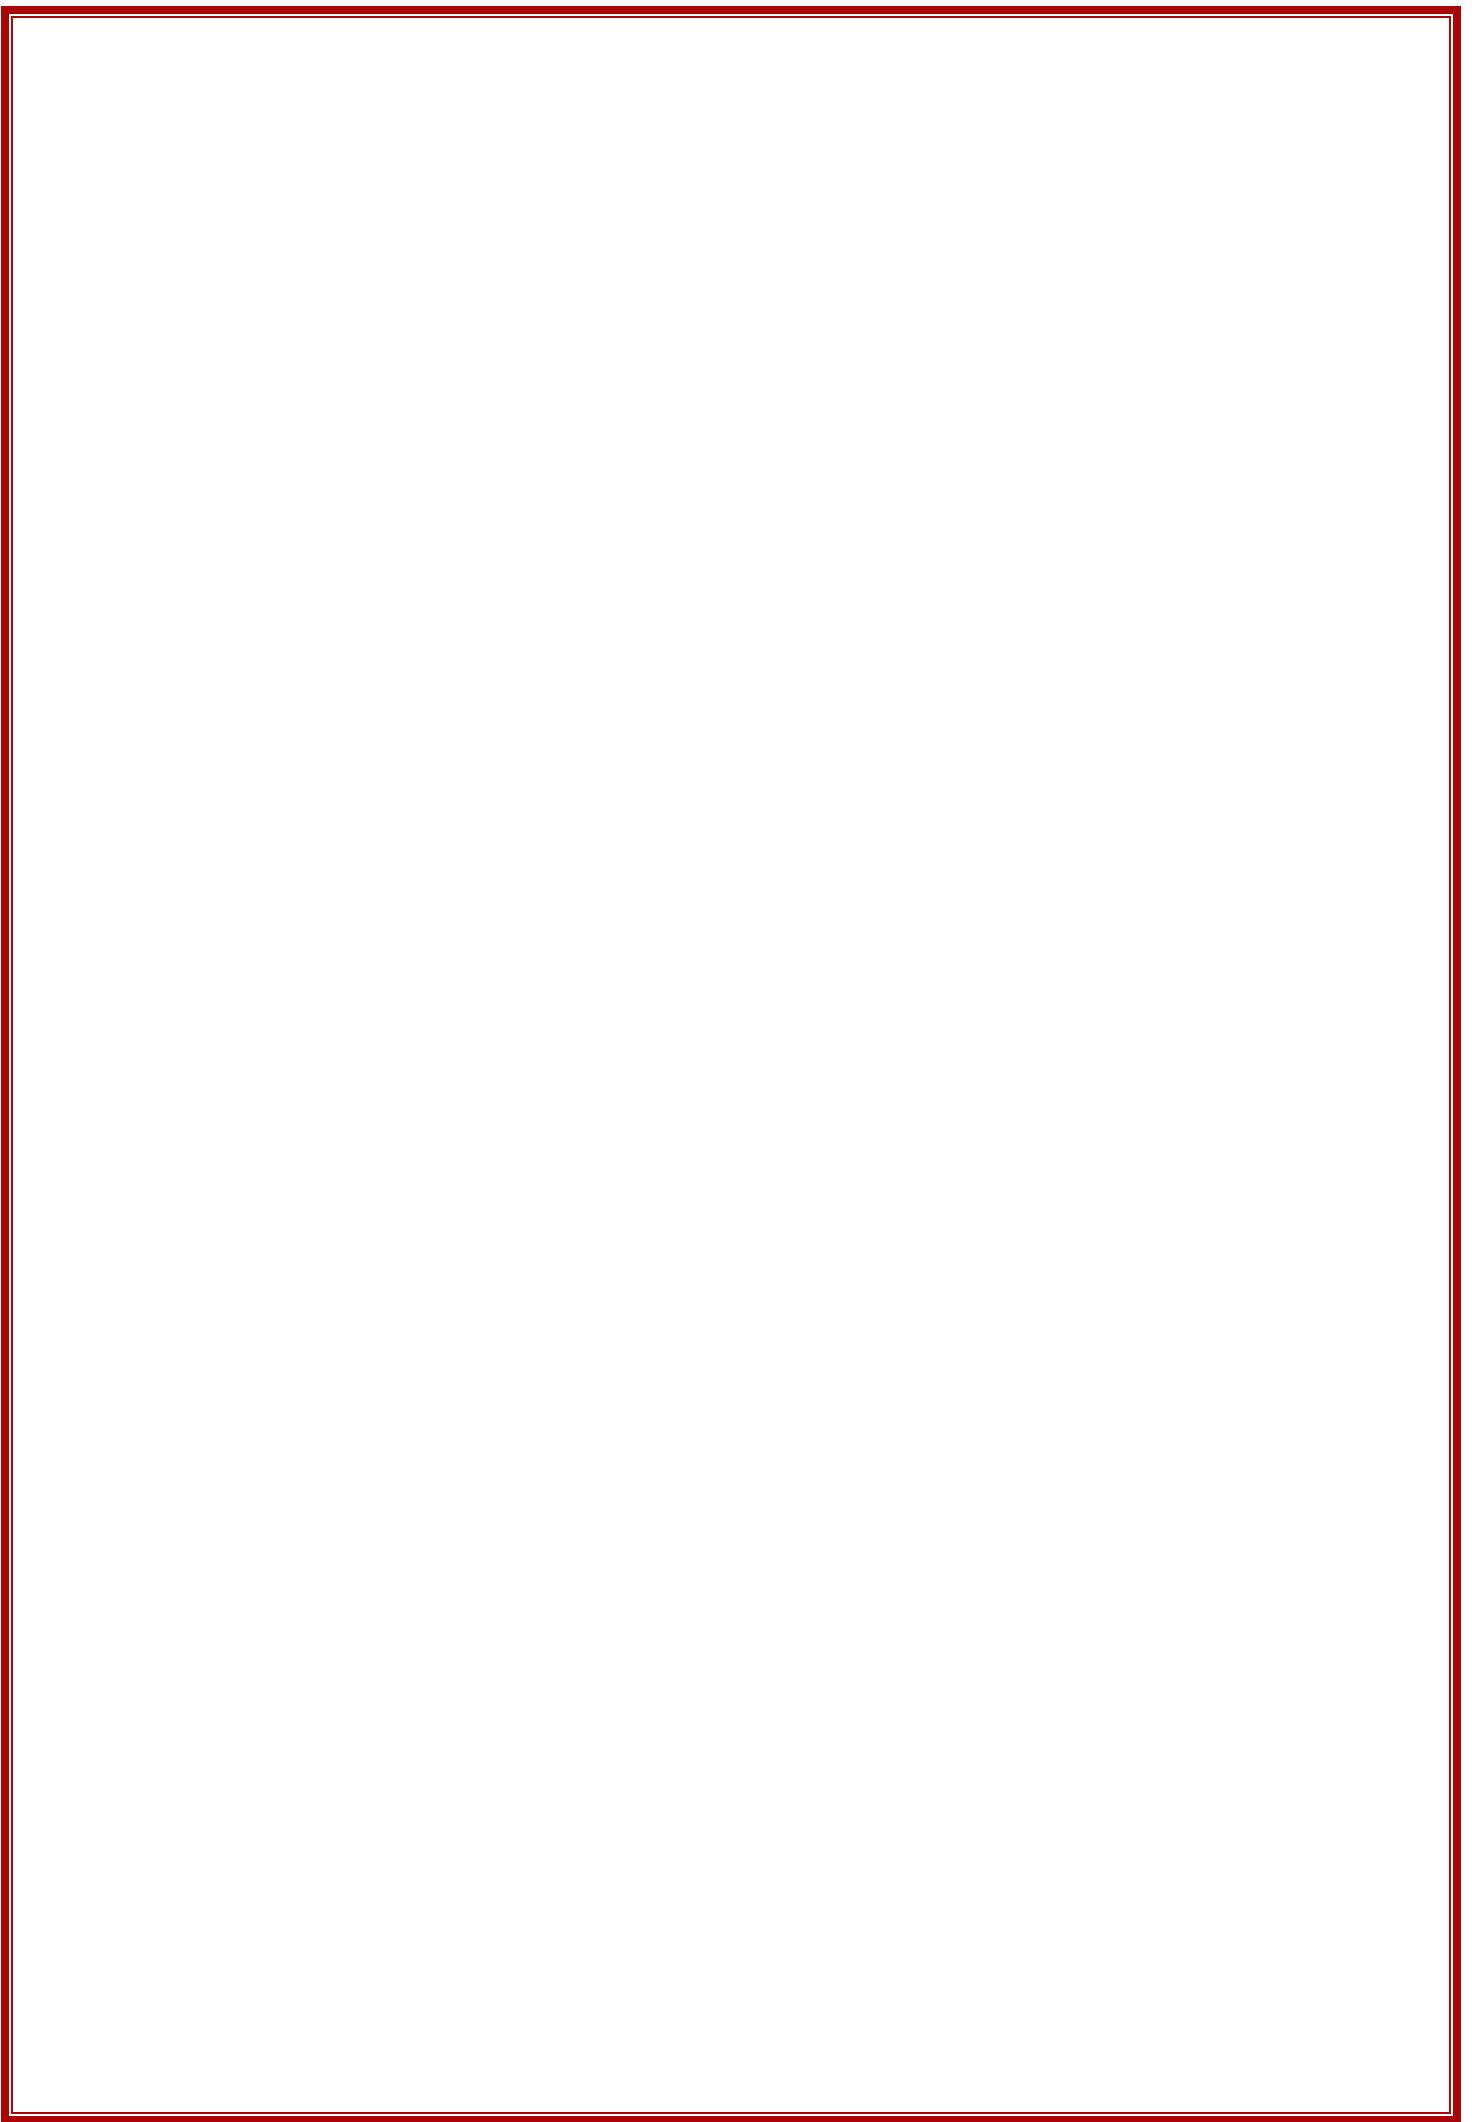

Barcelona, 8-10 February 2017

WELCOME LETTER

The Spanish Conference on Electron Devices (CDE) is the biannual meeting of the Spanish research groups and companies working in the field of electronic devices. In this 11th edition, which takes place from February 7th to 10th 2017, the conference returns to Barcelona, where this series started in 1997. The initial event was followed by the conferences in Madrid (1999), Granada (2001), Calella de la Costa-Girona (2003), Tarragona (2005), El Escorial-Madrid (2007), Santiago de Compostela (2009), Palma de Mallorca (2011), Valladolid (2013) and Aranjuez-Madrid (2015).

In this edition, the Conference program, which starts on February 8th, consists of 105 contributions. Out of them, 6 plenary/invited talks, 41 oral contributions and 58 poster presentations, which will be made visible throughout the duration of the conference to stimulate the discussion among the participants. Most of the contributions submitted and accepted at this conference come from Spanish Universities and Research Centres. In their majority, they are the result of cooperation between research teams from different institutions, including international universities. This proves the level of internationalisation of the Spanish Electron Device community.

The program is organized around five topic sessions, namely:

- S1 Graphene, new devices and device processing
- S2 Device modelling and simulation. New device concepts
- S3 Characterization and reliability
- S4 Sensors, actuators and micro/nano systems, including biomedical devices
- S4 Emerging devices
- S5 Optoelectronic, photovoltaic devices and displays. Hybrid and organic electronics

Special thanks are given to the organisations and companies that have given economical support to the organisation of this conference. Universitat de Barcelona, the Institute of Nanoscience and Nanotechnology of Universitat de Barcelona, Obra Social Fundación "La Caixa", the IEEE Spanish Section and the company Adler-Instrumentos are sincerely acknowledged for their economical support.

Finally, we want to warmly acknowledge the members of the different CDE Committees and all those researchers that, all together, collaborated in evaluating the submitted abstracts and helped in composing the final conference program. Without them, the conference's structure would be different. Our gratitude also goes to the chairs of the organising committees of previous editions, for their continuous support and for their help by providing practical information and direct help.
